**SUPPLEMENTAL INFORMATION AND ENDNOTES**

**Explanation of Non-GAAP Measures and Certain Metrics**

In order to better assess the Company's financial operating results, management believes free cash, EBITDA, interest coverage, EPS excluding acquisition-related integration expenses, enterprise net interest income and enterprise interest-earning assets are appropriate measures for evaluating the operating and liquidity performance of the Company. We believe that the elimination of certain items from these measures is helpful to analysts and investors who may wish to use some or all of this information to analyze our current performance, prospects and valuation. Our management uses non-GAAP information internally to evaluate our operating performance and in formulating our budget for future periods.

**Free Cash**

Free cash as reported by the Company represents cash held at Parent and non-Bank or Brokerage subsidiaries less discretionary reserves plus excess capital at Bank and Brokerage after regulatory capital requirements and the Company's own regulatory capital guidelines. The Company believes that free cash is a useful measure of the Company's liquidity as it excludes cash reflected on the balance sheet that may not be freely available to the Company.

**EBITDA**

EBITDA represents net income from continuing operations before corporate interest expense, taxes and depreciation and amortization. Management believes that EBITDA provides a useful additional measure of our performance by excluding certain non-cash charges and expenses that are not directly related to the performance of our business.

**Interest Coverage**

Interest coverage represents EBITDA divided by corporate interest expense. Management believes that by excluding the charges and expenses that are excluded from EBITDA, interest coverage provides a useful additional measure of our ability to continue to meet our interest obligations and our liquidity.

**EPS Excluding Acquisition-Related Integration Expenses**

EPS excluding acquisition-related integration expenses represents net income plus acquisition-related integration expenses, net of tax divided by diluted shares. Management believes that excluding charges associated with the integration of our acquisitions from EPS provides a useful measure to assess the operating performance of the Company.

**Enterprise Net Interest Income**

Enterprise Net Interest Income is taxable equivalent basis net interest income excluding corporate interest income and interest expense, stock conduit interest income and expense and interest earned on customer cash held by third parties. Management believes this non-GAAP measure is useful to analysts and investors as it is a measure of the net interest income generated by our core operations.

**Enterprise Interest-Earning Assets**

Enterprise interest-earning assets are average interest-bearing assets determined based on the definition of enterprise net interest spread, which excludes corporate interest-earning assets and stock conduit assets. Management believes this metric is an indicator of the Company's ability to grow net interest income by increasing the size of the balance sheet.

It is important to note these metrics and other non-GAAP measures may involve judgment by management and should be considered in addition to, not as a substitute for, or superior to, net income, consolidated statements of cash flows, or other measures of financial performance prepared in accordance with GAAP. For complete information on the items excluded from these non-GAAP measures, please see our financial statements and "Management's Discussion and Analysis of Results of Operations and Financial Condition" that will be included in the periodic report we expect to file with the SEC with respect to the financial periods discussed herein.

(1) EPS excluding acquisition-related integration expenses is a non-GAAP financial measure per applicable SEC regulations. The \$0.01 per share was calculated as acquisition-related integration expenses of \$5 million after tax divided by 439,460,000 diluted shares.

(2) Operating margin is the percentage of every dollar of revenue that goes to net income before other income (expense), income taxes, minority interest and discontinued operations. The percentage is calculated by dividing our income before other income (expense), income taxes, minority interest and discontinued operations by our total net revenue.

(3) Reflects elimination of transactions between Retail and Institutional segments, which include deposit transfer pricing, servicing and order flow rebates.

(4) Enterprise net interest spread is the taxable equivalent rate earned on average enterprise interest-earning assets less the rate paid on average enterprise interest-bearing liabilities, excluding corporate interest-earning assets and liabilities, stock conduit and cash held by third parties.

(5) Amounts and percentages may not calculate due to rounding.

(6) Q2-06 estimate.

(7) Excludes loans to customers on margin.

(8) Includes segregated cash balances.

(9) Free credits are balances held in customer accounts arising from deposits of funds and sales of securities.

(10) Gross-up for tax-exempt securities.

(11) Net interest income earned on average stock conduit assets of \$0.4 billion, \$0.8 billion and \$0.7 billion for the quarters ended June 30, 2006, March 31, 2006 and June 30, 2005, respectively.

(12) Includes interest earned on customer assets of \$3.4 billion, \$3.6 billion and \$1.6 billion for the quarters ended June 30, 2006, March 31, 2006 and June 30, 2005, respectively, held by parties outside E\*TRADE FINANCIAL, including third party money market funds and sweep deposit accounts at unaffiliated broker-dealers.
